CONTENTS

Vol. 3, No. 1 **March 1974**

A Nucleus of a Theorem-Prover Described in ALGOL-68 1
Jacques Cohen, Laurent Trilling, and Peter Wegner

A Simulation Tool for Performance Evaluation of the IBM 360/75 33
Edward K. Bowdon, Sr., Sandra A. Mamrak, and Fred R. Salz

Heuristically Aided Set-Covering Algorithms 59
James P. Ignizio and R. M. Harnett

Computer Diagnosis of Goiters. IV. Optimal Planning of Physical Observations 71
A. Bouckaert

A Model for Optimizing Indexed File Structures 93
Ben Shneiderman

Vol. 3, No. 2 **June 1974**

MRPPS—An Interactive Refutation Proof Procedure System for Question-Answering 105
Jack Minker, James R. McSkimin, and Daniel H. Fishman

A Full Table Quadratic Search Method Eliminating Secondary Clustering 123
Seiichi Nishihara and Hiroshi Hagiwara

Application of Fuzzy Logic to the Detection of Static Hazards in Combinational Switching Systems 129
Abraham Kandel

One-Way Acceptors and Languages 141
Eugene S. Santos

On an Information Processing Model Applied to Optical Illusions and Computer Simulations 153
C. A. Mateescu and I. O. Stamatescu

The Choice of Partial Inversions and Combined Indices 167
Michael Stonebraker

Vol. 3, No. 3 **September 1974**

Syntax Extension Using a Run Time Model 189
Jay Earley

Algorithms for List Structure Condensation 197
Gary Lindstrom

Representations of the Language Recognition Problem for a Theorem Prover 217
Jack Minker and Gordon J. VanderBrug

Redundancy Check Technique for Designing Optimal Networks by Branch-and-Bound Method 251
Hung Chi Lai, Tomoyasu Nakagawa, and Saburo Muroga

Vol. 3, No. 4 **December 1974**

Sequential Syntactical Decoding 273
Flavio Roberto Dias Velasco and Celso de Renna e Souza

Some Restrictions on *W*-Grammars 289
Sheila A. Greibach

Time Series Model for Texture Synthesis 329
Bruce H. McCormick and Sadali N. Jayaramamurthy

Computer Diagnosis of Goiters. The Optimal Size of Optimal Subsymptomatologies 345
A. Bouckaert
